Quality Antibodies

Epitomics is committed to producing quality antibodies utilizing our proprietary rabbit fusion partner technology which produces antibodies with high affinity and specificity. With extensive antibody characterization, each antibody is always tested in five different assays (WB, IHC, ICC/IF, FC, and IP) and in multiple species (Human, Mouse, and Rat). For more information, please visit www.epitomics.com.

Satisfaction Guarantee

We guarantee every antibody to work as described on the product data-sheet. If any product purchased from Epitomics does not perform as indicated please contact us and we'll try and help you to get it working or replace the antibody.
