

Post-Translational Modification Custom Services

Insight Biotechnology is pleased to bring our customers news of Epitomics Modified Antigen (α -Mod) RabMAb[®] Development Services. Provide Epitomics with conjugated peptides or protein sequence(s) for peptide design & synthesis. Take advantage of Epitomics' powerful RabMAb[®] technology to generate crucial reagents for your drug development effort. For more information and to obtain a free quote email info@insightbio.com.

- Use Epitomics superior technology for development of phospho, methyl, acetyl or glycosylated targets
- Robust rabbit immune system allows for maximum exposure of small epitopes
- Screen for single, dual or pan specificity
- Screen for neo-epitopes created from cleavage events
